RE: Letter of Support to the Sindicato Nacional dos Aeronautas (SNA)

On behalf of the Kenya Airline Pilots Association (KALPA), we extend our solidarity and unwavering support to the Sindicato Nacional dos Aeronautas (SNA) in its campaign, **“For the Right to Fly Safely – Against the Collapse of the Brazilian Air Transport System.”**

We are deeply concerned by the issues raised regarding the fast-tracked advancement of Bill PL 539/2024, the increasing fatigue and deteriorating working conditions affecting flight crews and the continued delay in addressing the special retirement regime under Bill PLP 42/2023.

KALPA firmly believes that fatigue, inadequate regulatory protections and precarious working conditions are critical aviation safety concerns that affect not only crew welfare, but also the safety of the entire aviation system.

Safe flight operations depend on properly rested and professionally regulated crews. Any measures that undermine these principles risk compromising aviation safety standards and the wellbeing of aviation professionals.

We commend SNA for its leadership and advocacy in defending the rights, health and safety of aviation crews in Brazil. We stand united with you in calling upon the relevant Brazilian authorities to engage constructively in addressing these important concerns.

Please accept our assurance of continued support and kindly keep us updated on your progress and any further developments. If there is anything KALPA can do to support your efforts, please do not hesitate to reach out.

In Unity,
For and on behalf of KALPA

Capt. Dzochera Warrakah
General Secretary & CEO

C.C:

Sebastián Currás-Barrios, Senior Officer - Professional & Government Affairs, IFALPA
